SUBJECT INDEX

Amorphous Solids
Glass Formation, Density 108 (1989) 221

Borates
Molecular Dynamics, Infra-red Absorption, Density of States 108 (1989) 260
Mössbauer Effect, Electrical Properties and Relaxation, Phosphates 108 (1989) 87
Raman Spectra, Tungstates 108 (1989) 109

Chalcogenides
Infra-red Absorption, Microstructure 108 (1989) 309
Structure, XANES, X-ray Diffraction 108 (1989) 169

Chemical Durability
Glass Surface, Interfaces, Silicates, Surface Analysis 108 (1989) 269

Colloids
Sol–Gel Method 108 (1989) 163
Sol–Gel Method, Interfaces 108 (1989) 18
Sol–Gel Method, Kinetics 108 (1989) 28

Computer Simulation
Sol–Gel Method, Fractals, Small Angle Neutron Scattering 108 (1989) 137

Crystallization
Glass Ceramics, Small Angle X-ray Scattering, X-ray Diffraction 108 (1989) 201
Nucleation 108 (1989) 99

Defects
Silica, Raman Spectra 108 (1989) 194

Densification
Silica, Density, Radiation Effects, Mechanical Properties, Relaxation, Photoinduced Effects, Ion Implantation, Structure, Glass Ceramics 108 (1989) 1

Density
Glass Formation, Amorphous Solids 108 (1989) 221
Silica, Radiation Effects, Mechanical Properties, Relaxation, Densification, Photoinduced Effects, Ion Implantation, Structure, Glass Ceramics 108 (1989) 1

Density of States
Borates, Molecular Dynamics, Infra-red Absorption 108 (1989) 260

Dielectric Properties
Ionic Conductivity, Glass Formation 108 (1989) 323

Elastic Properties
Young's Modulus, Theory 108 (1989) 187

Electrical Properties and Relaxation
Mössbauer Effect, Borates, Phosphates 108 (1989) 87

Electrochemical Properties
Sol–Gel Method, Secondary Ion Mass Spectroscopy, Silica 108 (1989) 143

Electron Diffraction
Oxides, Mössbauer Effect 108 (1989) 128

Electronic Conductivity
Glow Discharge, Hydrogenation, Silicon 108 (1989) 115

Entropy
Structure, Thermodynamics 108 (1989) 301

EXAFS
Sol–Gel Method 108 (1989) 333

Fractals
Sol–Gel Method, Computer Simulation, Small Angle Neutron Scattering 108 (1989) 137

Glass Ceramics
Crystallization, Small Angle X-ray Scattering, X-ray Diffraction 108 (1989) 201
Nucleation, Silicates 108 (1989) 237
Silica, Density, Radiation Effects, Mechanical Properties, Relaxation, Densification, Photoinduced Effects, Ion Implantation, Structure 108 (1989) 1
Sol–Gel Method, Nuclear Magnetic Resonance, Metal Alkoxide 108 (1989) 49

Glass Formation
Amorphous Solids, Density 108 (1989) 221

Ionic Conductivity, Dielectric Properties 108 (1989) 323
Metallic Glasses 108 (1989) 233

Glass Surface
Chemical Durability, Interfaces, Silicates, Surface Analysis 108 (1989) 269

Glass Transition
Sol–Gel Method, Organic–Inorganic Hybrids 108 (1989) 157

Glasses Containing Transition Metal Ions
Metallic Glasses, Structure, Hydrogen Effects 108 (1989) 216
Optical Properties, Silicates, Refractive Index 108 (1989) 294

Glow Discharge
Electronic Conductivity, Hydrogenation, Silicon 108 (1989) 115

Growth Kinetics
Sol–Gel Method, Transient Effects 108 (1989) 315

Halide Glasses
Nuclear Magnetic Resonance, Kinetics 108 (1989) 289

Hydrogen Effects
Metallic Glasses, Structure, Glasses Containing Transition Metal Ions 108 (1989) 216

Hydrogenation
Electronic Conductivity, Glow Discharge, Silicon 108 (1989) 115
Silicon, Photoresponse 108 (1989) 207
Silicon, Photoresponse 108 (1989) 211

Infra-red Absorption
Borates, Molecular Dynamics, Density of States 108 (1989) 260
Chalcogenides, Microstructure 108 (1989) 309
Sol–Gel Method, Silicates 108 (1989) 45

Interfaces
Chemical Durability, Glass Surface, Silicates, Surface Analysis 108 (1989) 269
Sol–Gel Method, Colloids 108 (1989) 18

Ion Implantation
Silica, Density, Radiation Effects, Mechanical Properties, Relaxation, Densification, Photoinduced Effects, Structure, Glass Ceramics 108 (1989) 1

Ionic Conductivity
Dielectric Properties, Glass Formation 108 (1989) 323

Kinetics
Halide Glasses, Nuclear Magnetic Resonance 108 (1989) 289
Sol–Gel Method, Colloids 108 (1989) 28

Light Scattering
Sol–Gel Method, Nuclear Magnetic Resonance, Metal Alkoxide 108 (1989) 249

Liquid Metals
Metallic Glasses, Neutron Diffraction, Structure 108 (1989) 58

Liquids
Silicates, Oxidation Reduction 108 (1989) 80

Mechanical Properties
Silica, Density, Radiation Effects, Relaxation, Densification, Photoinduced Effects, Ion Implantation, Structure, Glass Ceramics 108 (1989) 1

Metal Alkoxide
Sol–Gel Method, Nuclear Magnetic Resonance, Glass Ceramics 108 (1989) 49
Sol–Gel Method, Nuclear Magnetic Resonance, Light Scattering 108 (1989) 249

Metallic Glasses
Glass Formation 108 (1989) 233
Neutron Diffraction, Liquid Metals, Structure 108 (1989) 58
Structure, Glasses Containing Transition Metal Ions, Hydrogen Effects 108 (1989) 216
Thermodynamics, Thin Films, X-ray Emission 108 (1989) 304
X-ray Diffraction 108 (1989) 75

Microstructure
Chalcogenides, Infra-red Absorption 108 (1989) 309

Molecular Dynamics
Borates, Infra-red Absorption, Density of States 108 (1989) 260

Mössbauer Effect
Electrical Properties and Relaxation, Borates, Phosphates 108 (1989) 87
Oxides, Electron Diffraction 108 (1989) 128

Neutron Diffraction
Metallic Glasses, Liquid Metals, Structure 108 (1989) 58

Nuclear Magnetic Resonance
Halide Glasses, Kinetics 108 (1989) 289
Sol–Gel Method, Glass Ceramics, Metal Alkoxide 108 (1989) 49

Sol–Gel Method, Light Scattering, Metal Alkoxide 108 (1989) 249

Nucleation
Crystallization 108 (1989) 99
Silicates, Glass Ceramics 108 (1989) 237

Optical Properties
Oxynitride Glasses, Structure 108 (1989) 180
Silicates, Refractive Index, Glasses Containing Transition Metal Ions 108 (1989) 294

Organic–Inorganic Hybrids
Sol–Gel Method, Glass Transition 108 (1989) 157

Oxidation Reduction
Liquids, Silicates 108 (1989) 80

Oxides
Electron Diffraction, Mössbauer Effect 108 (1989) 128

Oxynitride Glasses
Optical Properties, Structure 108 (1989) 180

Phosphates
Mössbauer Effect, Electrical Properties and Relaxation, Borates 108 (1989) 87

Photoinduced Effects
